

IT Procurement Automation

Streamlining Standard Laptop Orders with Flow Designer

PROBLEM STATEMENT

The legacy IT procurement workflow relies on manual coordination, causing configuration delays, user downtime, and high operational overhead.

USER STORY

As an IT procurement team member, I want standard laptop requests to automatically create and assign configuration tasks to the Hardware team upon approval.

CORE OBJECTIVES

- Automate task creation and assignment to eliminate manual steps.
- Reduce request-to-delivery turnaround time for standard laptops.
- Improve task visibility across the IT hardware team.

Implementation Guide & Task Workflow

Milestone 1: Flow Creation & Configuration (Flow Designer)

1. **Access Flow Designer:** Navigate to **All** > Search for Flow Designer > Select **Flow Designer** under *Process Automation*.
2. **Create New Flow:** Click **New** > Select **Flow**.
3. **Configure Flow Properties:**
 - **Flow Name:** Standard laptop task
 - **Application:** Global
 - **Run As:** System User
 - Click **Submit**.
4. **Set Up Trigger:** Click **Add a trigger** > Select **Service Catalog** as the trigger source > Click **Done**.
5. **Add Action – Create Catalog Task:** Click **Add an Action** > Search and select **Create Catalog Task**. Assign Request Item using the data pill picker. Set Short Description to Laptop needs to Configured.
6. **Configure Task Field Values:** Set Description to Laptop needs to Configured, Assignment Group to Hardware, and Approval to Approved. Click **Save** and **Activate**.

Implementation Guide (Continued)

Milestone 2: Service Catalog Flow Assignment

1. Navigate to **All** > Search for **Maintain Items**.
2. Locate and open the catalog item **Standard Laptop**.
3. Select the **Process Engine** tab.
4. Clear any existing workflows/execution plans and assign the **Flow** field to Standard laptop task.
5. Save and Update the record.

Milestone 3: Execution & End-to-End Testing

1. **Order Submission:** Go to **Service Catalog > Hardware**. Select **Standard Laptop** (Lenovo Carbon x1) and click **Order Now**.
2. **Approval Verification:** Open the generated Request record (REQ0010001). Under the **Approvers** tab, right-click the record and select **Approve**.
3. **Task & Assignment Verification:** Open the linked Requested Item record (RITM0010001). Verify under **Catalog Tasks** that a new task (SCTASK0010001) is generated with correct assignments.

Verification Summary

Field	Expected Value	Observed Output	Status
Trigger Source	Service Catalog	Service Catalog	Verified
Generated Task	sc_task Record	SCTASK0010001	Verified
Assignment Group	Hardware	Hardware	Verified
Short Description	Laptop needs to Configured	Laptop needs to Configured	Verified
Approval Status	Approved	Approved	Verified
