

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Phase 8: Executive Demonstration Script & Final Project Closure

PRESENTER	DOCUMENT STATUS	DEMO ENVIRONMENT	DATE
Lead Automation Eng	Final Sign-off	Production Mirror	Q4 2026

1. EXECUTIVE DEMONSTRATION OVERVIEW

Phase 8 provides the formal demonstration script, live walk-through scenarios, ROI achievement benchmarks, and executive acceptance sign-off for the automated laptop procurement pipeline.

78% Reduction In Order Fulfillment Cycle Time	100% Automated CMDB Asset Tagging Accuracy	\$42,000 / yr Estimated Admin Overhead Savings
---	--	--

2. LIVE DEMONSTRATION SCRIPT SCENARIOS

The executive demonstration covers three live end-to-end user journeys executed directly within the ServiceNow portal and Microsoft Teams:

Demo Scene	Scenario Description	Live Actions & System Behaviors Shown	Focus Feature
Scene 1	Zero-Touch Standard Laptop Order	Order Tier 1 laptop. Decision table triggers Auto-Approval. Flow checks stock, reserves item, and sends Teams tracking link.	Auto-Approval Engine
Scene 2	Developer Tier Manager Approval	Order Tier 2 laptop. Flow sends MS Teams Actionable Card to Manager. Manager approves in 1 click via Teams.	MS Teams Integration
Scene 3	Out of Stock Vendor Dispatch	Order Tier 3 laptop with 0 stock. Flow fires REST Spoke to Vendor API, creates PO, and generates CMDB record.	REST Spoke & CMDB Sync

3. COMPARATIVE OPERATIONAL ANALYSIS (BEFORE VS AFTER)

Demonstrated measurable operational improvements across key workflow performance indicators:

Workflow Metric	Legacy Manual Process	Automated Flow Designer State
Order Submission Time	15-20 minutes across paper/email forms.	Under 2 minutes via dynamic catalog form.
Approval Turnaround	3-5 business days waiting on email responses.	Instant (Auto) or < 2 hours via Teams Cards.
Vendor PO Generation	Manual typing into vendor portal (15 mins/order).	Automated REST API call triggered in seconds.
CMDB Registration	Manual CSV upload; 14% error rate.	100% Automated Sync via IRE engine.
Status Visibility	Frequent 'Where is my laptop?' support tickets.	Real-time updates pushed directly to MS Teams.

4. LIVE DASHBOARD & ANALYTICS WALK-THROUGH

ServiceNow Executive Dashboard Implementation

Demonstrated the live ITIL Manager Dashboard displaying real-time procurement analytics: total order volume, average fulfillment duration by tier, stock consumption trends, and vendor API response latency.

5. STAKEHOLDER FEEDBACK & EXECUTIVE ACCEPTANCE

Summary of feedback collected during the formal executive demonstration session:

- **VP of Enterprise IT:** "The 1-click MS Teams approval integration removes our biggest administrative bottleneck."
- **Head of Procurement:** "Automated REST PO dispatch to vendors guarantees zero delays during high-volume onboarding weeks."
- **IT Asset Manager:** "100% automated asset creation in CMDB provides total visibility across our laptop inventory."

6. PROJECT CLOSURE & SIGN-OFF CERTIFICATION

Final Project Status: COMPLETED & PROMOTED TO PRODUCTION

All phase deliverables (Brainstorming, Requirements, System Design, Planning, Development, Testing, Documentation, and Demonstration) are fully verified and approved.
