1. KNOWLEDGE ARCHITECTURE OVERVIEW

Phase 7 compiles operational documentation, standard operating procedures (SOPs), system administrator manuals, and end-user quick reference guides into ServiceNow Knowledge Base (KB) categories.

KB Article ID	Article Title	Target Audience & Purpose	Access Role
KB009101	End-User Guide: Ordering Standard Laptops	Step-by-step instructions for employees to request laptops and track delivery in MS Teams.	sn_request_user
KB009102	Manager SOP: Dynamic Laptop Approvals	Guide for approving/rejecting requests via Microsoft Teams actionable cards or Service Portal.	approver_user
KB009103	System Admin Manual: Flow & Decision Tables	Technical guide for maintaining Decision Tables, adjusting threshold limits, and monitoring flow logs.	admin / sn_flow_designer
KB009104	Troubleshooting Guide: REST Spoke Exceptions	Runbook for resolving vendor API failures, stuck flows, and manual task overrides.	itil / hardware_admin

2. SYSTEM ADMINISTRATOR OPERATIONS RUNBOOK

Critical Admin Operations Routine

System Administrators must monitor the Flow Designer execution error logs weekly (sys_flow_context) to identify persistent API latency or stuck approval flows.

3. STANDARD OPERATING PROCEDURE (SOP): IT FULFILLMENT QUEUE

Procedure for IT Asset Management (ITAM) teams when handling automated hardware allocations:

SOP Step 1: In-Stock Staging

When Flow Designer reserves local stock, an automated task is assigned to the local stockroom. The asset manager scans the serial number, updating state to 'In Transit'.

SOP Step 2: Vendor Order Exceptions

If an automated vendor REST API order fails, an automated high-priority incident is routed to Procurement. The officer follows KB009104 to manually re-trigger the payload.

4. DECISION TABLE MAINTENANCE GUIDE

Instructions for updating corporate expenditure thresholds without editing Flow Designer code:

1. Navigate to **Process Automation > Decision Tables** in the ServiceNow Filter Navigator.
2. Select Decision Table `dt_laptop_approval`.
3. To adjust the auto-approval cap (default \$1,500), update the `Cost` upper boundary column.
4. Click **Publish** to apply updated budget logic immediately to future catalog requests.

5. END-USER FAQ & SUPPORT ESCALATION MATRIX

User Question / Issue	Automated Self-Service Guidance	Escalation Path
Where is my laptop order?	Check MS Teams notification card or view RITM stage bar in Service Portal.	Virtual Agent Service Desk
Need to change shipping address post-submit?	If status is 'Pending Approval', cancel RITM and resubmit with new address.	IT Support Desk Line
Manager hasn't received approval card?	Manager can approve directly via Service Portal 'My Approvals' tab.	Flow Admin Intervention

6. OPERATIONAL HANDOVER & MAINTENANCE PLAN

Ownership of technical artifacts is formally transferred from the ServiceNow Project Engineering Team to the Sustaining Platform Operations Team upon production go-live.

Artifact Domain	Primary Maintenance Team	Sustaining Responsibility
Service Catalog Items	ITSM Portal Operations	Form variable updates, drop-down options, UI policy adjustments.
Flow Designer Logic	ServiceNow Core Admins	Flow error queue monitoring, sub-flow maintenance, version upgrades.
Integration & REST Spokes	Enterprise Integration Team	OAuth token renewal, API endpoint URL updates, vendor SLA monitoring.
CMDB & Asset Mapping	Hardware Asset Mgmt (HAM)	CI class reconciliation, serial number validation, stock room mapping.

7. PHASE 7 REPOSITORY VERIFICATION SIGN-OFF

Documentation Verification Status: COMPLETE

All technical runbooks, user quick-reference cards, and KB articles have been published to the ServiceNow production instance and linked to relevant service catalog forms.
